So for the top grid	d, this is referri	ng to the NSA's Acti	ons of secretly ga	ther Us citizen and	d foreigners Data	. This violates priv	/acy, security, con	fidentiality, and sa	lety in society, tel	ecommunication a	and GPS. One	
f the ways the N	ISA got the dat	a was from metadat	a, this metadata v	vas unique phone	number/email ad	dress of caller/red	cipient, the time of	calls and their du	ration, and the loc	ation of caller/red	ipient.	
he act of the NS	A gathering m	etadata was actually	ruled unconstitut	ional later on, as i	it exposed citizens	s activities, life, co	ommunications, et	c and possess a tl	reat to their priva	cy, confidentiality	, safety, and secu	rity.
Vith the location	also being exp	osed in the metadat	a, this also impac	ts the GPS.								
he bottom grid I	ooks at this fro	m the POV of Edwa	rd Snowden. He d	bviously violated	the privacy, secur	ity, confidentiality	and safety of the	global surveillance	e, national securit	y, and society to a	smaller degree.	
ne, he illegally i	out out confide	ntial information fror	n the NSA. This a	rguably puts the N	NSA in a vulnerabl	e and weak posit	ions, which in a sr	naller degree, imp	acts the safety ar	nd security of soci	ety.	
think overall he	was exposing	some wrongdoings	by government th	ough, so although	n, he did cross sor	ne ethical bounda	ries, considering	his intent, he did it	to a way lesser o	learee when com	pared to the gove	rnment.
